Work Experience

April 2018 - September 2018, (6 months)
Senior front-end developer at **SoftServe company** on health-care project.

I worked on the CRM for medical institutions from Germany and Austria used for recording appointments of the patients.
Responsibilities: Develop new features, code-review, refactor, unit-testing, bug-fixing, scrum

Tools & Technologies: JavaScript, TypeScript, Angular 4/1.5 (angular-decorators npm library), git, WebStorm

October 2017 - March 2018
(6 month)
Senior front-end developer at **LeadsMarket company**

The project was CMS for lead generation analysis with data visualisation (diagrams, graphs, etc.)
Responsibilities: Develop new features, code-review, refactor, bug-fixing, scrum
Tools & Technologies: JavaScript, TypeScript, Angular 4, WebStorm, git

September 2016 - February 2017
(6 month)
Senior front-end developer at **SDL company.**

My project was comlex ERP system used for retail management for big brands like Nike and Coca-Cola.
Responsibilities: Develop new features, code-review, refactor, unit-testing, bug-fixing, scrum
Tools & Technologies: JavaScript, TypeScript, React, Redux, TDD, C#, Visual Studio, git

August 2013 - December 2015
(2 years 5 months)
Senior front-end developer at **SoftServe company** on various projects.

Some of the projects, I worked on, were:
   - the module for CRM,
   - the charity marketplace (on this project I mentored 2 or 3 junior frontend developers),
   - the code evaluation project, this was software for technical interviews in IT sphere,
   - the electronic document management system for tablets, used by technical specialist while they collected information about alarm installation from their clients (people),
   - the admin panel for server and network monitoring with alerts
   - ...and even Internet-radio.
Responsibilities: Develop new features, code-review, refactor, unit-testing, bug-fixing, scrum, mentoring, decision-making
Tools & Technologies: JavaScript/HTML/CSS, ExtJs, Angular 1.*, git, mercurial

April 2012 - August 2013
(1 year 5 months)
Front-end Tech Lead at **Oversun-media company.**
The project was online browser MMORPG.

Responsibilities: Lead and develop MMORPG front-end including new features, architect design, bug-fixing, scrum, decision-making, providing estimates.

Tools & Technologies: JavaScript, jQuery, JavaScriptMVC, requirejs, knockoutjs, git, mercurial

August 2010 - March 2012
(1 year 8 months)
Middle Developer at **Archer Software company.**

I had the several projects like gift finder for facebook friends and admin panel for survey system.
Responsibilities: Develop new features, bug-fixing, maintain , scrum
Tools & Technologies: PHP4, PHP5, MySQL, Drupal 6, CakePHP, Kohana (CodeIgniter fork),
JavaScript/HTML/CSS, jQuery

January 2009 - May 2010
(1 year 5 months)
Developer at **AMB Group ltd.**

The Project was an electronic document management system including digital signature and electricity bills payment system for big businesses.
Responsibilities: Develop new features, bug-fixing, contributing to documentation
Tools & Technologies: C#, Silverlight (3,4), ASP.NET MVC, Javascript/HTML/CSS, JS, jQuery (VI),
